AKMAL FADHLUL ROHMAN

Jakarta, Indonesia | +62 813-1698-7822 | akmalfdhlulr@gmail.com | GitHub

PROFESSIONAL SUMMARY

Informatics Engineering student at Universitas Tarumanagara with hands-on experience in full-stack web development, REST API development, and database management. Developed a web-based inventory management system for a small retail business and contributed to several academic software projects. Also experienced in cybersecurity research and responsible vulnerability disclosure.

EDUCATION

Universitas Tarumanagara - *Informatics Engineering* *Aug 2024 – Jul 2028*

Jakarta, Indonesia

- *GPA: 3.64/4.00*
- Relevant Coursework: Software Engineering, Web Development, Database Systems, System Analysis, and Computer Networks.

TECHNICAL SKILLS

- **Programming & Frameworks:** JavaScript, React, Next.js, Node.js, Express.js, Vite
- **Backend & Database:** REST APIs, PostgreSQL, Prisma ORM, JWT Authentication, Database Design
- **Software Engineering:** System Analysis, Software Testing, Black-Box Testing
- **Tools & Deployment:** GitHub, Vercel, Cloudinary
- **Cybersecurity:** Web Security, Vulnerability Identification, Responsible Disclosure, SOC Fundamentals

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Warung Sembako Abah Andi *Mar 2026 – Jun 2026*

Sukabumi, West Java

- Developed a web-based inventory and expiration management system for a small retail business.
- Implemented product and batch management, stock-in/out transactions, First Expired, First Out (FEFO), expiration monitoring, notifications, and reporting.
- Built the application using Next.js, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT Authentication, and Cloudinary.
- Conducted black-box testing across 16 test scenarios.

Independent Cybersecurity Researcher *Nov 2022 – Dec 2022*

Jakarta, Indonesia

- Identified web security vulnerabilities affecting an electronic system of the DKI Jakarta Provincial Government.
- Reported the findings through responsible vulnerability disclosure.
- Received formal appreciation from Diskominfotik Provinsi DKI Jakarta.

SELECTED PROJECTS

Stock & Expiry Management Information System | Link Web

- Developed a full-stack inventory management application using Next.js, Express.js, PostgreSQL, and Prisma ORM.
- Implemented batch tracking, stock transactions, FEFO, expiration notifications, and reporting.

Saung Riung Community Website | Link Web

- Developed a community website using React, Vite, Node.js, Express.js, and REST APIs.
- Separated frontend and backend architecture and deployed the application using Vercel.

UCCD Official Website | Live Website

- Developed a website for Untar Computer Club and Development (UCCD), a student organization under the Faculty of Information Technology at Universitas Tarumanagara.
- Built pages supporting organizational information, activities, and competition-related content.

Lumio - Personal Finance Tracker | GitHub Repository

- Developed a personal finance tracking application for managing income, expenses, debts, and financial records.
- Implemented structured financial data management and dashboard-based monitoring of cash flow and outstanding obligations.

ORGANIZATIONAL EXPERIENCE

Dewan Perwakilan Mahasiswa - Universitas Tarumanagara *Jul 2026 – Present*

Expert Staff, Commission 3 & Biro 4

- Support organizational oversight, internal discussions, and coordination within Commission 3.
- Assist Biro 4 with operational preparation, equipment management, and event support.
- Coordinate attendance, task assignments, and logistical requirements for organizational activities.

PUBLICATION

Sistem Informasi Manajemen Stok dan Kedaluwarsa Berbasis Web untuk UMKM
Jurnal Ilmu Komputer dan Sistem Informasi (JIKSI), Vol. 14, No. 2, 2026

DOI: 10.24912/jiksi.v14i2.38685

CERTIFICATIONS & AWARDS

L1 SOC Analyst | View Certif **— Jadi Hacker (2023)**

- Certification covering SOC fundamentals, security monitoring, incident analysis, and response concepts.

Cybersecurity Vulnerability Reporting Appreciation | View Awward – **Diskominfotik Provinsi DKI Jakarta (2022)**

- Recognition for identifying and responsibly reporting vulnerabilities in a government electronic system.
